

DroneSuite®

The SaaS for the integral management of UAV operations

ITG's DroneSuite® is a cloud platform to manage and control all business activities of a RPAS operator.

DroneSuite® allows monitoring and control of operations, automate and standardize processes, as well as ensuring quality and the traceability of each action. It provides a great added value to workflows while reducing fixed costs.

Integrate all the devices of your company in an intuitive, safe and versatile work flow.

Automate processes through DroneSuite® and only worry about flying.

DroneSolutions

Functionalities

COMMAND & CONTROL

View and control all your assets in real-time. Plan and execute the flight plan with the GCS. Synchronization of LiveView and telemetry with DroneSuite®.

FLEET MANAGEMENT

Manage every vehicle, payload and accessory of your company. Organize and keep up to date permits, licenses and insurance policies of each pilot. Keep up the synchronized Flight Book. Incident report and follow-up.

MAINTENANCE

Organize maintenance plans to guarantee the perfect care of each element of your fleet. Assign checklists to the team to ensure full compliance.

OPERATIONS MANAGEMENT

Plan and design in the office the operations that will be carried out in the field. Cloud storage of the captured videos and images. Create and assign checklists to standardize all the processes. Execute the flight plan with the GCS app while automatically synchronises with DroneSuite®.

ADMINISTRATION

Performs different generic tasks for the operator (user registration, assignments, documentation, etc.)

DATA PROCESSING

Process and exploit the captured information using 3D models in real time (request quotation).

RESULTS

Generate results with presentation graphic and documentary in the form of reports and statistics (request quotation).

Advantages of DroneSuite®

More efficient flight forecasts

Plan and execute your flights in detail to ensure the best possible results. Full control of the strategic planning. Avoid the time waste.

Reduce your operational costs

Control the assets and personnel of your company in real time. Improve the management of your resources and ensure greater profitability.

Security in the cloud

Process and store all your company's information safely and with guarantees. No longer worry about file maintenance.
